

# Workflow

- 1 Navigate to the hosting's panel

- 2 Click on "Account Settings".

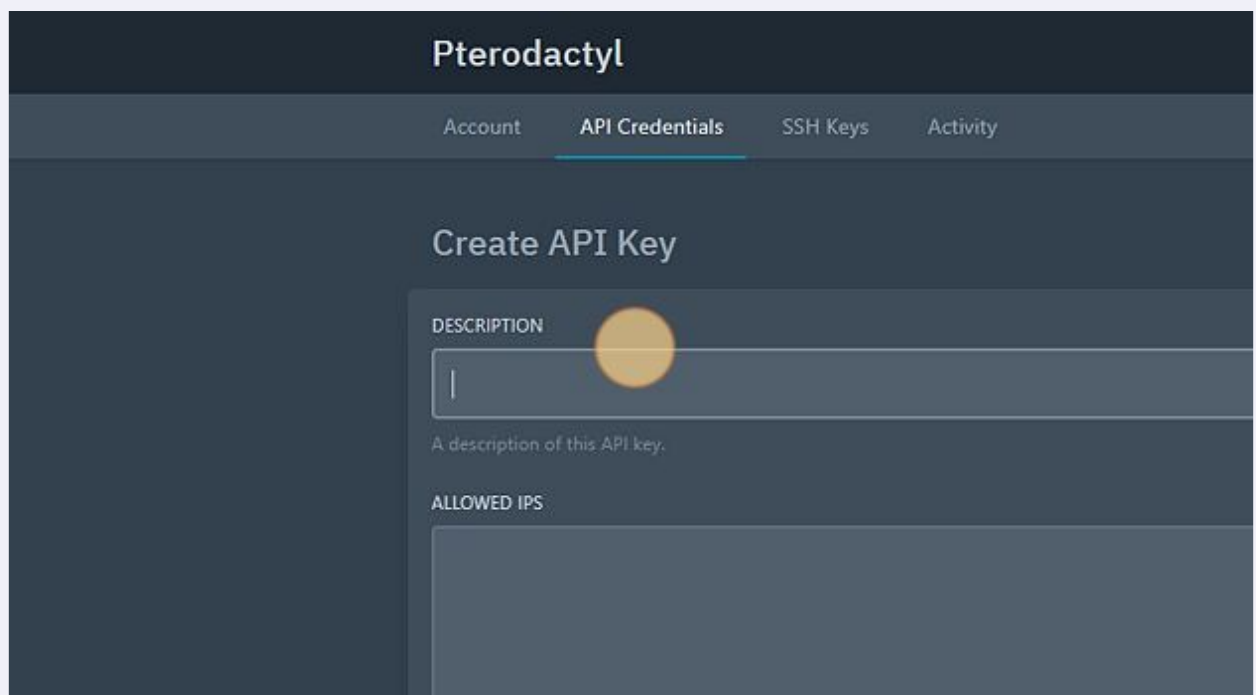

3 Click on "API Credentials"

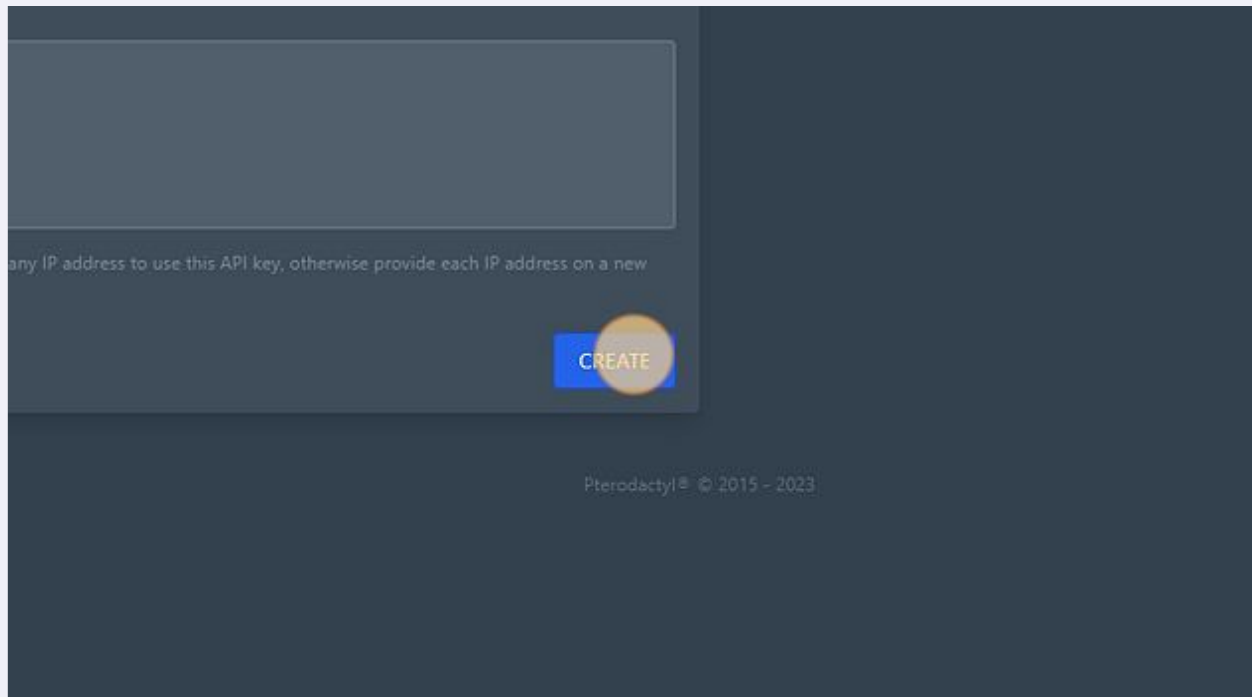

The screenshot shows the Pterodactyl web interface. At the top, there's a dark header with the 'Pterodactyl' logo. Below it is a navigation bar with four tabs: 'Account', 'API Credentials', 'SSH Keys', and 'Activity'. The 'API Credentials' tab is highlighted with a blue underline and a yellow circle. The main content area is divided into two columns. The left column is titled 'Update Password' and contains three input fields: 'CURRENT PASSWORD', 'NEW PASSWORD', and 'CONFIRM NEW PASSWORD'. Below the 'NEW PASSWORD' field is a note: 'Your new password should be at least 8 characters in length and unique to this website.' The right column is titled 'Update Email Address' and contains an 'EMAIL' input field with the text 'tutomine@dinbot.xyz' and a 'CONFIRM PASSWORD' input field. A blue 'Update Email' button is at the bottom of the right column.

4 Click this field.  
Type anything

The screenshot shows the Pterodactyl web interface with the 'API Credentials' tab selected. The main heading is 'Create API Key'. There are two main sections: 'DESCRIPTION' and 'ALLOWED IPS'. The 'DESCRIPTION' section has a text input field with a yellow circle highlighting it. Below the input field is a placeholder text: 'A description of this API key.' The 'ALLOWED IPS' section has a large, empty text area for input.

5 Click on "CREATE"

6 Now you have your client key!
